# Focus and Design of My Website

The focus of my website's layout is to create a clean, intuitive, and user-friendly interface that makes navigation seamless and ensures an enjoyable experience. I've implemented a flexible design using CSS Flexbox and Wrap properties to ensure the layout adapts smoothly to different screen sizes, providing an optimal viewing experience across all devices.
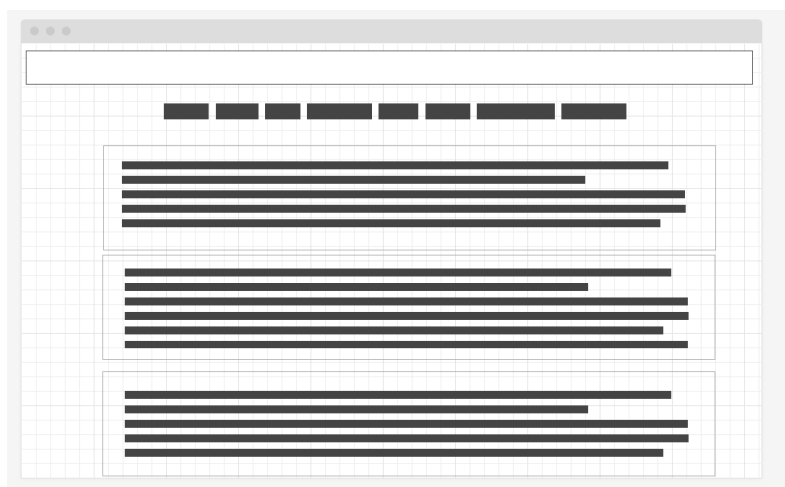

Color Scheme and Aesthetics

I've chosen a color scheme with various shades of green, symbolizing growth, energy, and innovation—values that reflect the purpose of my portfolio. Green is also strongly associated with technology and development, reinforcing the professional focus of my site. I've paired this with white and light backgrounds to create a minimalist, open atmosphere that keeps attention on the content without overwhelming the viewer.

My goal with this theme is to strike the perfect balance between professionalism and approachability, offering a modern, engaging, and welcoming experience for anyone who visits.

Pages Layout

Main Page

Consistent Layout

I've kept a consistent layout for the Professional, Personality, and Personal Development pages to ensure a cohesive and smooth user experience across these sections.

Future Features

Downloadable Documents
I plan to allow visitors to download my résumé or project reports directly from the site.

Newsletter Signup
I want to encourage visitors to sign up for a newsletter to stay updated on my latest projects, blog posts, or insights.

Search Functionality
I'm considering adding a search bar so users can quickly find specific content, making it easier to navigate my site as it grows.
